

American Welding Society® BETZ is the only Accredited Test Facility in India for American Welding Society, USA.

BETZ is also an International Agency for AWS to conduct Seminars and Certification Exams.

BETZ is a Corporate Partner of AMERICAN SOCIETY FOR NON-DESTRUCTIVE TESTING, U.S.A.

CERTIFIED WELDER

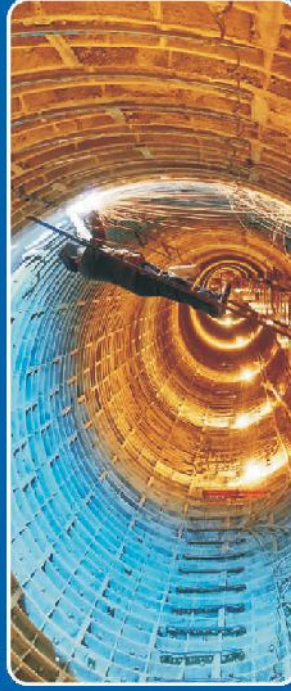

BROCHURE FOR THE YEAR - 2015

AWS Certification - a passport to rewarding career

www.welding-certification.com

All Qualification & Certification will be conducted in our own state of the Art Training & Research Division, a 12,000 sq-ft. premises at Tambaram, Chennai.

AN ISO 9001 : 2008

BETZ ENGINEERING & RESEARCH DIVISION

American Welding Society
INTERNATIONAL

American Welding Society®
Accredited Test Facility
ATF

Schedule

Topics to be covered

Day-1 Welding & Cutting Process, Safety, Weld Geometry & Terminology, Drawing & Specification, Testing methods, Producing & Maintaining Records

Day-2 Understanding & Interpreting assigned WPS and PQR

Day-3 Practical on Weld, How to Qualify PQR as per WPS, Testing & Qualification

FEES STRUCTURE

Seminar & Qualification

Seminar	Rs. 5,000/-*
Qualification Fee	Rs. 15,000/-**
A/C - Accommodation Charges	Rs. 1,500/-**

*Service Tax Applicable as per Govt. Norms @ 12.36%
** For the entire seminar days of Accommodation.

**ONE YEAR COMPLIMENTARY
BETZ MEMBERSHIP**

About BETZ

BETZ Engineering & Technology Zone is the only "ATF-Accredited Test Facility" for AWS to evaluate and certify welders. It is also an international agency for AWS to conduct seminars and examinations for Certified Welding Inspectors. BETZ has helped in certifying more than 1800 CWIs in the past 6 years. BETZ is also a third party inspection company having deployed its NDT technicians and Quality Assurance engineers in various projects across India, Middle East countries and South East Asia.

About AWS

The American Welding Society (AWS) was founded in 1919, and is known internationally to have documented the best practices, and the best way to test the skillset of several job profiles in the engineering industry. When AWS test and certifies a technician or an engineer, the international community accepts that this person is suitable for that job specification.

Certified Welder

AWS has devised evaluation and testing programs based on various Process, Positions and Codes on international standards. When a welder exhibits his welding skill under the supervision of a well-defined evaluation process and welding inspector, and when the weld quality is accepted based on the acceptance criteria of various applicable codes when subjected to various tests as Visual, Radiography and Mechanical tests the said welder shall be certified as a successful and employable welder. AWS maintains the database of such welders and also issues AWS Certified Welder-cards and Certificates to those welders. The certification is valid for 6-months and can be renewed every six months automatically by providing your experience certificate and renewal fees.

Who can Qualify

"Certified Welder" program is a performance/skill based program and doesn't need any formal education to qualify. Any Welder who possess the skill of welding Plates or Pipes using any one of Gas or Arc welding methodologies can take this certification. Since this Certification is a proof of the skill of the welder exhibited at the evaluation, it will help the employers to easily shortlist such candidates for local and overseas welding assignments. So those who possess welding skills and aspiring to take an international certificate to help go abroad and work, shall take this certification.

Training & Certification Process

Though the welders can take this test directly without any training, BETZ Research & Training division strongly recommends that the Welder go through a 3-day training program on Weld fundamentals, Interpreting and Understanding WPS, Safety procedures and understanding the process of AWS evaluation and Certification.

On the end of the training, and on the test day the Welder will be guided to choose a WPS and go through the welding process on the supervision of an AWS certified Welding Inspector. On the end of the welding process, the weld specimen shall be subjected to various tests as per WPS and results shall be declared within a week. The Certification and Welder Card will be shipped from AWS USA for the successful welders, in about three weeks from the time of test.
